Track, monitor and audit every part of the 3D printing process with our reporting tools

Use reports to bill users, analyze trends and estimate filament usage over periods of time. Justify expansion of your 3D printing program by having the data to back it up.

3D Print from any device

Enable driver-free 3D printing on Chromebooks, Android, macOS, iOS, and Windows devices in any combination.

Reduce overheads. Seize innovation. Manage the workflow for your users.

Manage Designs

Your employees, users and staff can create design libraries and share files and projects with ease.

Make Printing Easy

Powerful visualization tools for every stage of the iteration process, so you can edit and print successfully.

Centralized Platform

Unify workflows for all printers. staff and students on a single platform.

Give Admins Power

Once a user submits a print request, admins may review settings and contact users for changes at any point in the work flow.

Fix and Distribute

Repair designs using Magic Fix then send files for 3D printing anywhere in your network.

Remote Access

Create queuing or print permissions for workgroups with data tracking and share access to printers network wide.

Workgroups & Billing, **Single Sign-On Integration**

Allocate access for specific users and 3D printers with queuing or printing rights. You can even attach specific slicing profiles to workgroups. Bill students by adding cost to a slicing profile and deducting it automatically from their balance or Papercut account.

Educational Institutions

across the world

What our users say!

"

George Velez

Head of Sales, Dremel Bosch

3DPrinterOS™ allows real-time central management of users, printers and files with any web browser in a universal solution.

11

Hector E Lugo

Technology Success Coordinator, University of Texas El Paso

3DPrinterOS has helped us ease the learning curve of 3D Printing for students and more importantly let us scale our programs at an outstanding pace and price. It has been an exceptional experience allowing us to reach a wide range of ages from K-12 through college.

"

Yonah Elorza

Making Studio Manager, Columbia University GSAPP

3DPrinterOS has allowed us to streamline our entire 3D printing operation. What before was a five step process including paper receipts, manual file slicing, loading onto SD cards and tracking via Excel sheets, is now a fully integrated system through 3DPrinterOS. The availability of remote printing couldn't have come at a better time either, with the pandemic forcing most of our students to work remotely - this hasn't hindered our 3D printing capabilities in the slightest, thanks to 3DPrinterOS.
